ip provided as found
ility and where possible

ADRENALINE
0.1 mg of adrenaline (1:10,000) in 0.5 ml of 0.9% saline
or 0.1 ml of 0.1% solution

ENDOTRACHEAL: 0.1 mg/kg/dose
INTRAVENOUS: 0.1-0.5 mg/kg/dose

DOSE:
0.1 mg/kg/dose
0.1-0.5 mg/kg/dose
0.1-0.5 mg/kg/dose

After each dose, re-assess the baby's condition. If the baby is still in need of resuscitation, repeat the dose. If the baby is stable, stop the adrenaline.

If HR continues to fall after 10 min of resuscitation, a 2nd dose of adrenaline can be given. If HR below 60 without spontaneous breathing after 20 min of resuscitation, call for help.
